

# KIDS SHOE SIZE CHART

## PRINTING INSTRUCTIONS

- To print, click the printer icon or press [Ctrl][P] keys.
- Be sure page scaling is set to "None" and printing options are NOT set to "Fit to Page".

For best results, your child should:

Stand on a hard surface, back turned, against the wall. Place heel on the back of the heel placement section, touching but not covering the blue line.

(Read the first line past the longest toe.)

Distribute full weight equally on both feet, while barefoot or wearing socks/tights (depending on how the shoes will be worn).

When measuring your child's feet, if the feet reach outside the lines, the feet are wider than average.

You should consider ordering the next size up. This will help prevent improper fitting shoes.

\*Be sure to measure both feet; many children have feet of different sizes. Purchase shoes in the larger of the two sizes.

## KIDS' FEET GROW FAST.

## MEASURE EVERY TIME YOU ORDER.

### ACCURACY CHECK!

To ensure correct printing size, place a **credit card here**.  
If it fits, the guide was printed correctly.
